

# Energy Supply Management Services

## Maximizing Energy Opportunities

### Strategic Energy Sourcing

ENGIE Insight leverages expert resources, combined with the collective experience of managing over 400 clients across a \$6 billion energy portfolio, to support informed decision-making in all deregulated markets.

- Supply Strategy Development: Development of a national energy sourcing strategy with ongoing monitoring and support
- RFP Management: Proprietary e-procurement tools support a comprehensive sourcing process and supplier assessment
- Hedging: Lock in percentages of load to take advantage of market pricing or hedging strategy
- Online Contract Administration: Automated tracking and online access to all energy supply agreements
- Comprehensive Post-Contract Audit: Ensures contract terms are accurately reflected in all supplier billings

## Energy Supply Management

### Market Intelligence

Stay informed about market drivers for proactive management of your energy sourcing decisions through the following features:

- Risk Management: 24/7 access to e-procurement risk management tools
- Market Intelligence: Detailed market analytics to support sourcing decision-making available directly through web-based reporting and emailed market updates
- Market Pricing: Visibility into deregulated market pricing data
- Regulatory Awareness: Briefings help you monitor changes in the regulatory landscape and the rules required to engage in third-party supply
- Market Pricing: Visibility to deregulated market pricing data
- Regulatory Awareness: Briefings help you monitor changes in the regulatory landscape and the rules required to engage in third-party supply

- ENGIE Insight provides energy supply contracts, energy sourcing or rate analysis to nearly 1.4 million energy accounts across North America
- 10+ average years experience of ENGIE Insight Procurement Managers, Transaction and Rate Analysts
- 120+ energy price indices continuously monitored, plus critical economic trends and weather impacts, translated into clear and concise guidance
- Nearly 2.5 billion points of current and historical energy data is analyzed, processed and stored in ENGIE Insight's expansive Energy Data Warehouse
- 1,100 monthly evaluations of energy supply offers, providing insight into retail market prices, unparalleled comparisons supporting negotiation

## Performance Reporting

Provide your stakeholders with a high level of visibility into deregulated energy spend management and compare your sourcing program performance against a rational set of benchmark options.

- Portfolio Reporting: Track the performance of deregulated supply contracts against various benchmarks such as the default regulated supply price, last year's supply rate, budget or other custom values to make the value visible
- Site Level Reporting: Drill down to see the supply rate paid at each site
- Wholesale Benchmarking: Compare wholesale market prices at the time of contract to current market prices

## Ongoing Rate Analysis

Our experienced team of rate analysts leverage the power of the ENGIE Insight National Rate Library to identify more advantageous utility tariff options, manage the rate change process and deliver savings back into your organization as quickly as possible.

## Regulated Rate Analysis

- Utility Rate Monitoring: Continuous monitoring of all regulated rate filings and pending rate changes keep you ahead of risks and opportunities in the regulated and deregulated markets
- Rate Change Implementation: ENGIE Insight does all the work for you, including all of the necessary paperwork and follow-up to ensure rate changes take place quickly and accurately
- Monthly Savings Opportunity Reporting: As a continuous, ongoing process, clients receive a monthly report for sites being reviewed on ENGIE Insight's monthly utility production cycle where change opportunities are identified

### See More

Gain broad visibility and precise insight into inefficiencies, with truth in data. Analyze resource use, target risks and inefficiencies, and model and measure past, real-time and future impacts.

### Save More

Lower expenses and increase return on capital investments, with truth in results. Make better use of your capital, equipment, facilities and people by managing demand and lowering costs across more categories.

### Sustain More

Build lasting advantages for the bottom line and environment, with truth in partnership. Change behavior among employees, clients and communities to manage and reduce carbon footprints. In turn, build a positive brand reputation, political capital and business value.
