

Waste Bill Processing & Analysis

Proactive Audits, Assured Payments.

Tracking waste service invoice data and conducting comprehensive audits to ensure service level and billing accuracy is labor intensive, and it's a task that often falls outside the scope of the accounts payable department. Dealing with billing mistakes and service level discrepancies often becomes a reactive task, if those mistakes and discrepancies are caught at all.

- Multi-site businesses struggle to manage numerous vendors for expense consolidation across multiple resource categories.
- Companies with geographically disparate sites lack visibility into total waste costs, as some expenses are billed directly by a hauler, others by a landlord, and still others by a municipality.
- These large enterprises find it particularly difficult to manage GL allocations from summarized waste hauler/broker bills.

The foundation of any successful waste management program is reliable and timely vendor payment. ENGIE Insight leverages our decades of experience processing millions of utility, waste and telecom bills to ensure that your vendors are accurately compensated for their services, while relieving administrative burden on your team.

Consistently Accurate Billing Data

ENGIE Insight Bill Processing & Analysis solutions draw from data-driven insights to accurately track costs, while providing superior outsourced accounts payable services that are integrated across multiple resource categories including energy, water, waste, and telecom.

But, paying waste and utility bills on time is only the beginning —ENGIE Insight Bill Processing & Analysis captures bills, analyzes them, fixes them, reports on them, and pays them on time.

- Integrated waste analysts and pre-and post-payment audits result in the most robust audit practices in the industry
- Continuous reporting allows accounts payable professionals to easily communicate cost trends to key stakeholders
- The ENGIE Insight Platform seamlessly integrates the cost categories of waste, energy, water, and telecom resources into one intuitive tool.
- ENGIE Insight offers the experience of managing a waste services portfolio that represents more than 55,000 sites and \$260 million in annual spending

ENGIE Insight manages waste expenses for over 55,000 sites nationwide

Enabling Action Through Visibility

Bill Processing & Analysis solutions from ENGIE Insight help finance, facilities, and operations professionals make better decisions through:

- Actionable insight. Detailed data collection and analysis uncovers the insight that leads to more profitable decision-making.
- Robust web reporting. The web-based ENGIE Insight Platform enables visibility of and access to data, which facilitates the ongoing measurement and optimization of waste spend.
- Automated accounts payable integration. Supporting inquiries from the field and upper management is made easier for accounting personnel through automated integration with client accounts payable systems.

Expert Guidance, Comprehensive Management

ENGIE Insight provides complete management of all Bill Processing & Analysis tasks, allowing our clients to focus on proactively driving cost savings and facility efficiencies. Bill Processing & Analysis provides a fully-outsourced payment solution with detailed data capture, robust reporting, and best-in-class analysis capabilities. These features allow ENGIE Insight and our clients to track how each facility manages energy, water, telecom, and waste costs and consumption, while ensuring those services continue without interruption.
